### 2 new slopes

The variety of slopes in the ski resort is also being expanded. From winter 2018/19 there will be two new slopes: a easy blue alternative to the existing black "Kristlerhang" valley run, and a new valley run from the Croda Rossa ski mountain towards Signau, an easy blue slope ideal for wide carving.

## NEWS IN WINTER

### 100 % snow reliability

The 3 Zinnen Dolomites ski resort is also investing heavily in its technical snow making: the new snow making system will become the most powerful in the whole of northern Italy. Initial Snow making for the resort will be reduced to a possibly record-breaking 40 hours. Part of the snow making system is a new, state-of-the-art pumping station: the first in Italy with a complete, stainless steel hydraulic system and a water reservoir with a capacity of almost 100,000 m<sup>3</sup>

### New 6-seater chairlift "Mittelstation"

After being in operation for more than 40 years, the nostalgic two-seater "Mittelstation" chairlift is being replaced by a new detachable 6-seater chairlift, with protective bubbles and heated seats. In addition the new chairlift will offer extraordinary comfort, especially to our younger guests: the child-friendly boarding conveyor belt, which goes up or down depending on children's the size, makes getting into the chairlift as easy and straightforward as possible for young skiers.

### New hut „Zin Fux“

In the winter season 2018/19 a new gourmet star will be rising in the ski resort: the new hut called "Zin Fux" in the Signau, opposite the Pollaio cult ski hut, is built in modern, alpine style with local wood and glazed façades and will be an irresistible attraction for foodies and other pleasure skiers in the future.
